HISTORIC
CLIFTON
MILL
ESTABLISHED 1802

The Millrace Restaurant

Keeping the way it was,

The Clifton Mill circa 1910

for almost 200 years.

THE HISTORY OF CLIFTON MILL

The Historic Clifton Mill is one of the largest water powered grist mills still in existence. Built in 1802, the mill was called Davis Mill by its founder, Owen Davis. One of the early owners was John Patterson, who helped create Dayton's NCR company. The mill provided cornmeal to federal troops during the Civil War. The Armstrong Family, then ran the mill for more than 20 years. Then three generations of the Preston Family ran the mill until 1948. Years and owners later, the Satariano family purchased the mill to help continue the preservation of such an historic and beautiful property. We continue to offer you a special place to enjoy and share.

Come take a tour and see how water power is still converted to energy to run the mill. You will see the early machinery and know-how of the early millers and the way stones grind grain into flour. It is truly an educational experience that you and your family or group will long remember. Come and see or call us for details.

Your breathtaking view of Clifton Gorge.

The Millrace Restaurant is here to serve you a truly home-cooked breakfast and lunch. Our pancakes and cornbread mix are made right here in the mill. Fresh, whole grain breads are baked daily along with homemade pies and cookies that are the best around.
